

# U.S. 59 / U.S. 169 Roundabout Garnett, Kansas

Kansas Department of Transportation

**DRG** prepared detailed construction plans for the reconstruction of the North Junction of U.S. 59 and U.S. 169, approximately one mile south of Garnett, Kansas. The existing intersection was a modified “Y” intersection with U.S. 59 forming the north approach, U.S. 169 forming the northeast approach, and both routes combining to form the south approach. This intersection was reconstructed with a single-lane rural roundabout with a 180-foot diameter inscribed circle.

*DRG was selected for this project based upon the high quality of work and coordination of previous projects completed for the Bureau of Traffic Engineering.*
