

Edgewood Sanitary Sewer Improvements

Unified Government of Wyandotte County / Kansas City, Kansas

In order to facilitate growth in the western sections of Wyandotte County, the Unified Government of Wyandotte County / Kansas City, Kansas requested that **DRG** design a new interceptor sewer for a development located in the area around 126th & State Ave.

The new interceptor now serves a drainage area of approximately 800 acres. The sewer is over 6,500 ft in length and ranges in size from 18" to 24" in diameter.

Due to the fast pace of growth in this area of Wyandotte County, DRG went from the project kick-off meeting to the completion of construction within a 12 month timeframe.
