

Wolcott Wastewater Treatment Plant

Unified Government of Wyandotte County/Kansas City, Kansas

The Unified Government of Wyandotte County/Kansas City, KS (UG) needed to expand sewage collection and treatment services to the growing western portions of the County.

DRG provided study level, design and construction phase services for the first phase of the expansion. The scope of work included construction of 7,500 ft. of 15 and 18-inch interceptor, installation of a 600 gpm influent pump station, and design of a 350,000 gallon per day package wastewater treatment plant. The new facility provides ammonia and nutrient reduction (Total Phosphorus and Nitrogen) to comply with strict NPDES effluent limits established by the state.
